

NEW Spring 2020 Course:

fab.physics.harvard.edu

PHY-SCI 70: Introduction to Digital Fabrication

T & Th 3:00-4:15 SC102

Are you interested in using the Science Center fabrication lab (SC 102) to make the project of your dreams and learn new skills in the process? Want to make things? Make machines? Make machines make things?

This course will introduce students to fabrication skills including CNC machining, molding and casting, sensor fabrication, microcontroller programming, radio communication (internet of things) and 3D printing.

Join us for the Science Center Fab Lab Open House to learn more!

Thursday January 23, 5-7pm
Science Center (1 Oxford St) Room 102
